

A scatter plot showing the relationship between 'Raw Score' (x-axis) and 'Adjusted Score' (y-axis). The x-axis ranges from 0 to 40 with major ticks at 10, 20, 30, and 40. The y-axis ranges from 0 to 40 with major ticks at 10, 20, 30, and 40. The data points are black dots, forming a dense, upward-sloping band from the bottom-left to the top-right. The band is wider at lower scores and narrows as the score increases. There are a few outliers above the main band at higher raw scores.
