

A scatter plot showing the relationship between 'True.Theta' (x-axis) and 'Predicted.Theta' (y-axis) for the 'theta' variable. The x-axis ranges from approximately -3 to 3, and the y-axis ranges from approximately -3 to 3. The data points are densely clustered along the diagonal line where predicted values equal true values, indicating high predictive accuracy. There are a few outliers, particularly at the extremes of the scale.
