

A scatter plot showing the relationship between the number of correct answers (X-axis) and the raw score (Y-axis). The X-axis ranges from 0 to 14, and the Y-axis ranges from 0 to 14. The plot shows a strong positive correlation, with data points forming a clear upward trend. The points are clustered along the diagonal line where the number of correct answers equals the raw score, indicating that each correct answer contributes equally to the total score.
