

A scatter plot showing the relationship between the number of correct answers (X-axis) and the raw score (Y-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0 to 10. The data points are clustered along the diagonal line where the number of correct answers equals the raw score, indicating a strong positive correlation. There are some outliers, particularly at higher raw scores where the number of correct answers is slightly less than the raw score.
