

The scatter plot displays the frequency of raw scores. The x-axis, labeled 'Raw Score', has major ticks at 2.5, 5.0, and 7.5. The y-axis represents the frequency of scores. The distribution is roughly bell-shaped, centered around a raw score of 5.0. The highest frequency is observed at a raw score of 5.0, with approximately 10 dots. Other notable frequencies occur at raw scores of 4.0, 5.5, and 6.0, each with about 8 dots. The plot uses black dots of varying sizes to represent the frequency of each score.
