

A scatter plot showing the relationship between 'True.Theta' (x-axis) and 'Predicted.Theta' (y-axis) for the 'theta' variable. The x-axis ranges from -2 to 2, and the y-axis ranges from -2 to 2. The plot features a dense cluster of points along the diagonal line  $y = x$ , indicating high predictive accuracy. There are several outliers, particularly in the upper right quadrant where predicted values are higher than true values, and a few points in the lower left quadrant.
