

The dot plot displays the raw scores for 100 students. The x-axis, labeled 'Raw Score', ranges from 0 to 10. The y-axis represents individual students, numbered 1 to 100. Each student's data is represented by a vertical line of dots, where each dot corresponds to a score on a specific item. The distribution shows that most students have scores between 4 and 6, with a few students achieving scores of 0 or 10.
