

Scatter plot showing the relationship between the Number of Features (X-axis) and the Raw Score (Y-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0.0 to 10.0. The plot shows a positive correlation, with the Raw Score generally increasing as the Number of Features increases. The data points are clustered around a linear trend, with some variability in the scores for each number of features.
