

The scatter plot displays the frequency of raw scores. The x-axis, labeled 'Raw Score', has major ticks at 2.5, 5.0, and 7.5. The y-axis represents the count of observations for each score. The distribution is roughly bell-shaped, centered around 5.0, with a slight right skew. The highest frequency is observed at a raw score of 5.0, with approximately 15 observations. There are also several observations at the extreme ends of the scale, specifically at 0.0 and 10.0.
