

A scatter plot showing the relationship between the Estimated Expected Score (X-axis) and the Observed Score (Y-axis). The X-axis ranges from 0 to 35, and the Y-axis ranges from 0 to 35. The data points are black dots, showing a strong positive correlation. A horizontal line is drawn at Y = 15, and a vertical line is drawn at X = 15, intersecting at (15, 15). The data points are clustered around the diagonal line Y = X, indicating that the estimated expected score is generally close to the observed score.
