

A scatter plot showing the relationship between 'Raw Score' (x-axis) and 'Adjusted Score' (y-axis). The x-axis ranges from 0 to 25, and the y-axis ranges from 0 to 25. The plot features a dense cloud of black data points, with a strong positive linear correlation. The points are most concentrated along the diagonal line where the raw score equals the adjusted score, indicating that the adjusted score is a refined version of the raw score. The background has a light gray grid.
