

The scatter plot displays the relationship between 'Raw Score' (x-axis) and the number of students (y-axis). The x-axis ranges from 0 to 10, and the y-axis ranges from 0 to 100. The data points are black dots, showing a clear upward trend from left to right, indicating that as the raw score increases, the number of students also increases. The distribution is roughly bell-shaped, peaking around a raw score of 5.5.
